Sponsored by the Flagstaff Field Institute and NOLS Wilderness Medicine

**DATES:** March 4-8, 2020

**TUITION:** \$770

**LOCATION:** Flagstaff, Arizona

## COURSE DESCRIPTION

The Wilderness Upgrade for Medical Professionals (WUMP) course is a nationally recognized program that trains urban caregivers to respond to medical emergencies in remote settings. This 48-hour course is ideal for Emergency Medical Technicians (EMTs), paramedics, nurses, physicians, and other medical professionals.

The course will upgrade an EMT to a Wilderness EMT and all others to a Wilderness First Responder (WFR) in accordance with current standards in pre-hospital medicine. Special topics include long-term patient care and monitoring, wound management, selective spine immobilization, reducing dislocations, litter packaging, epinephrine administration, field care for environmental emergencies, and advice on expedition medications. The WUMP is not a technical rescue or survival course. The focus of the program is on prevention, decision-making, improvisation, and long-term medical care in a wilderness setting.

You'll learn to apply your urban emergency care knowledge to the wilderness through case studies and practical scenarios with mock patients. Our seasoned instructors will guide you through five days of intense, hands-on learning to make sure you are prepared in the wilderness.

Upon successful course completion, you will earn the following NOLS Wilderness Medicine certifications: Wilderness First Responder or Wilderness EMT (depending on your current certification) and Epinephrine Auto-injector.
