EMERGENCY ALERTS

2m ago

Presidential Alert

THIS IS A TEST of the National Wireless
Emergency Alert System. No action is needed.

How has automation and/or technology positively impacted your program?

Break out....

The Paradox of Automation

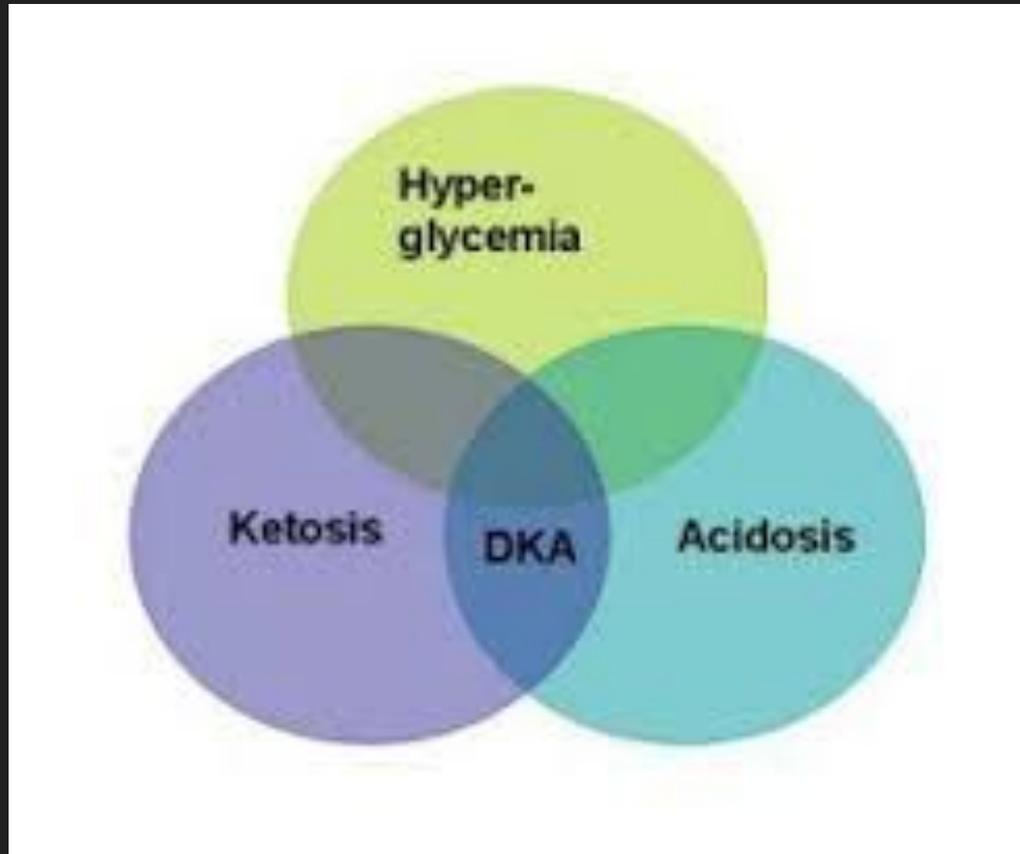

The Paradox of Automation

1. Automatic systems accommodate incompetence by being easy to operate and automatically correcting mistakes.
2. Even if the operator is an expert automatic systems erode skills.
3. Systems fail in unusual ways or produce unusual situations.

With the potential for dire consequences...

What automation/technology concerns do you have for your programs? Actually experienced and/or anticipated...

Go back to your groups

Share experiences/concerns

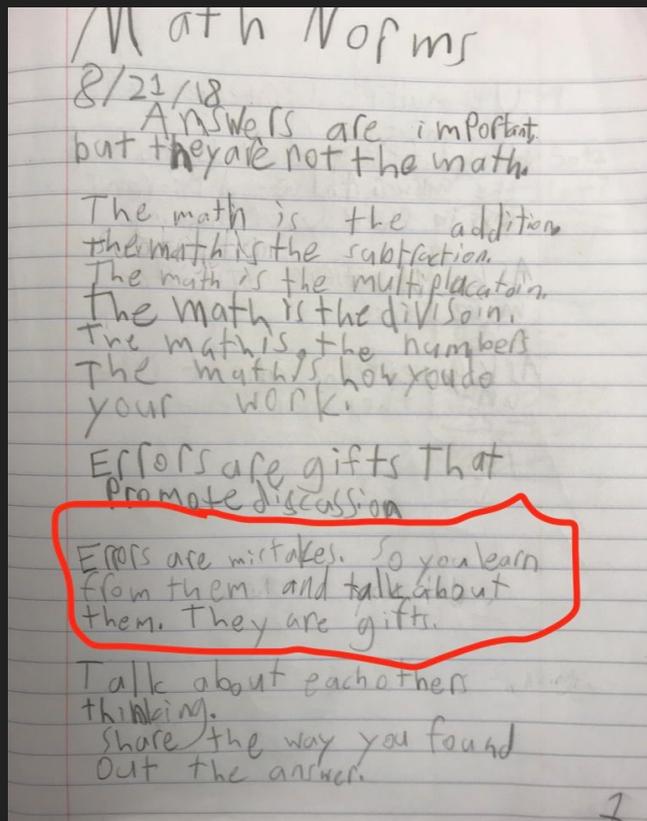

Be prepared to share out

What can we do?

Put some unleaded in the diesel tank

Training

Stress and Startle response

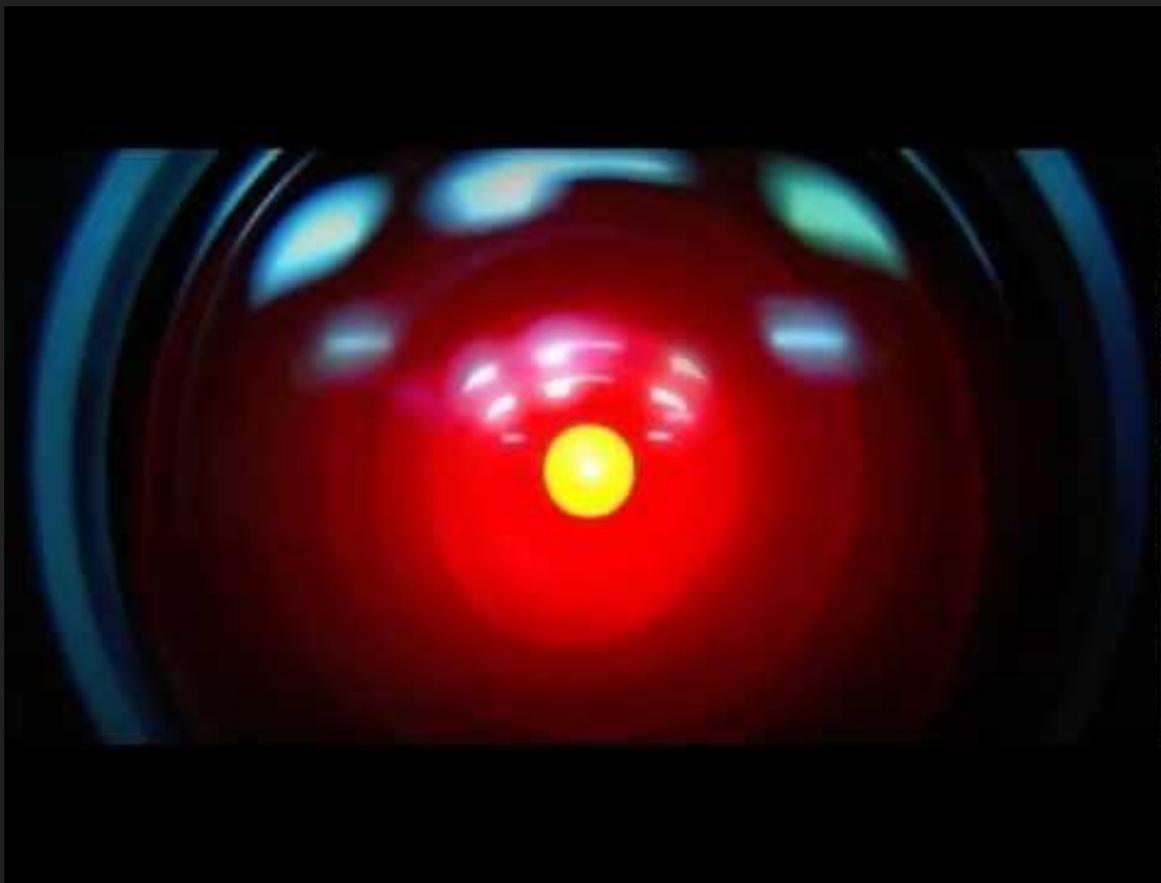

Strategies for Improving Startle Performance

- **Know your craft: Maintain handling skills**
- **Train appropriately**
- **Be cognisant of your surroundings**
- **Avoid complacency**
- **Anticipate threats**
- **Have a plan**

Keep it simple

Action Steps

1. Create a staff training exercise that allows staff to see the potential for passivity in decision making when decisions are device influenced.
2. Review what devices/apps are used and for what purpose in your organizations.
3. Share internal examples and case studies with program managers.

Thanks!
