**CHELSEY THWAITES**

**PROGRAM DIRECTOR**

**CHELSEY@GOBROADREACH.COM**

# OBJECTIVES

Gain a simple, working understanding of what AI actually is—and isn't

Practice writing effective prompts and testing outputs.

Understand the risks, limitations, and ethics so we use these tools wisely, not recklessly.

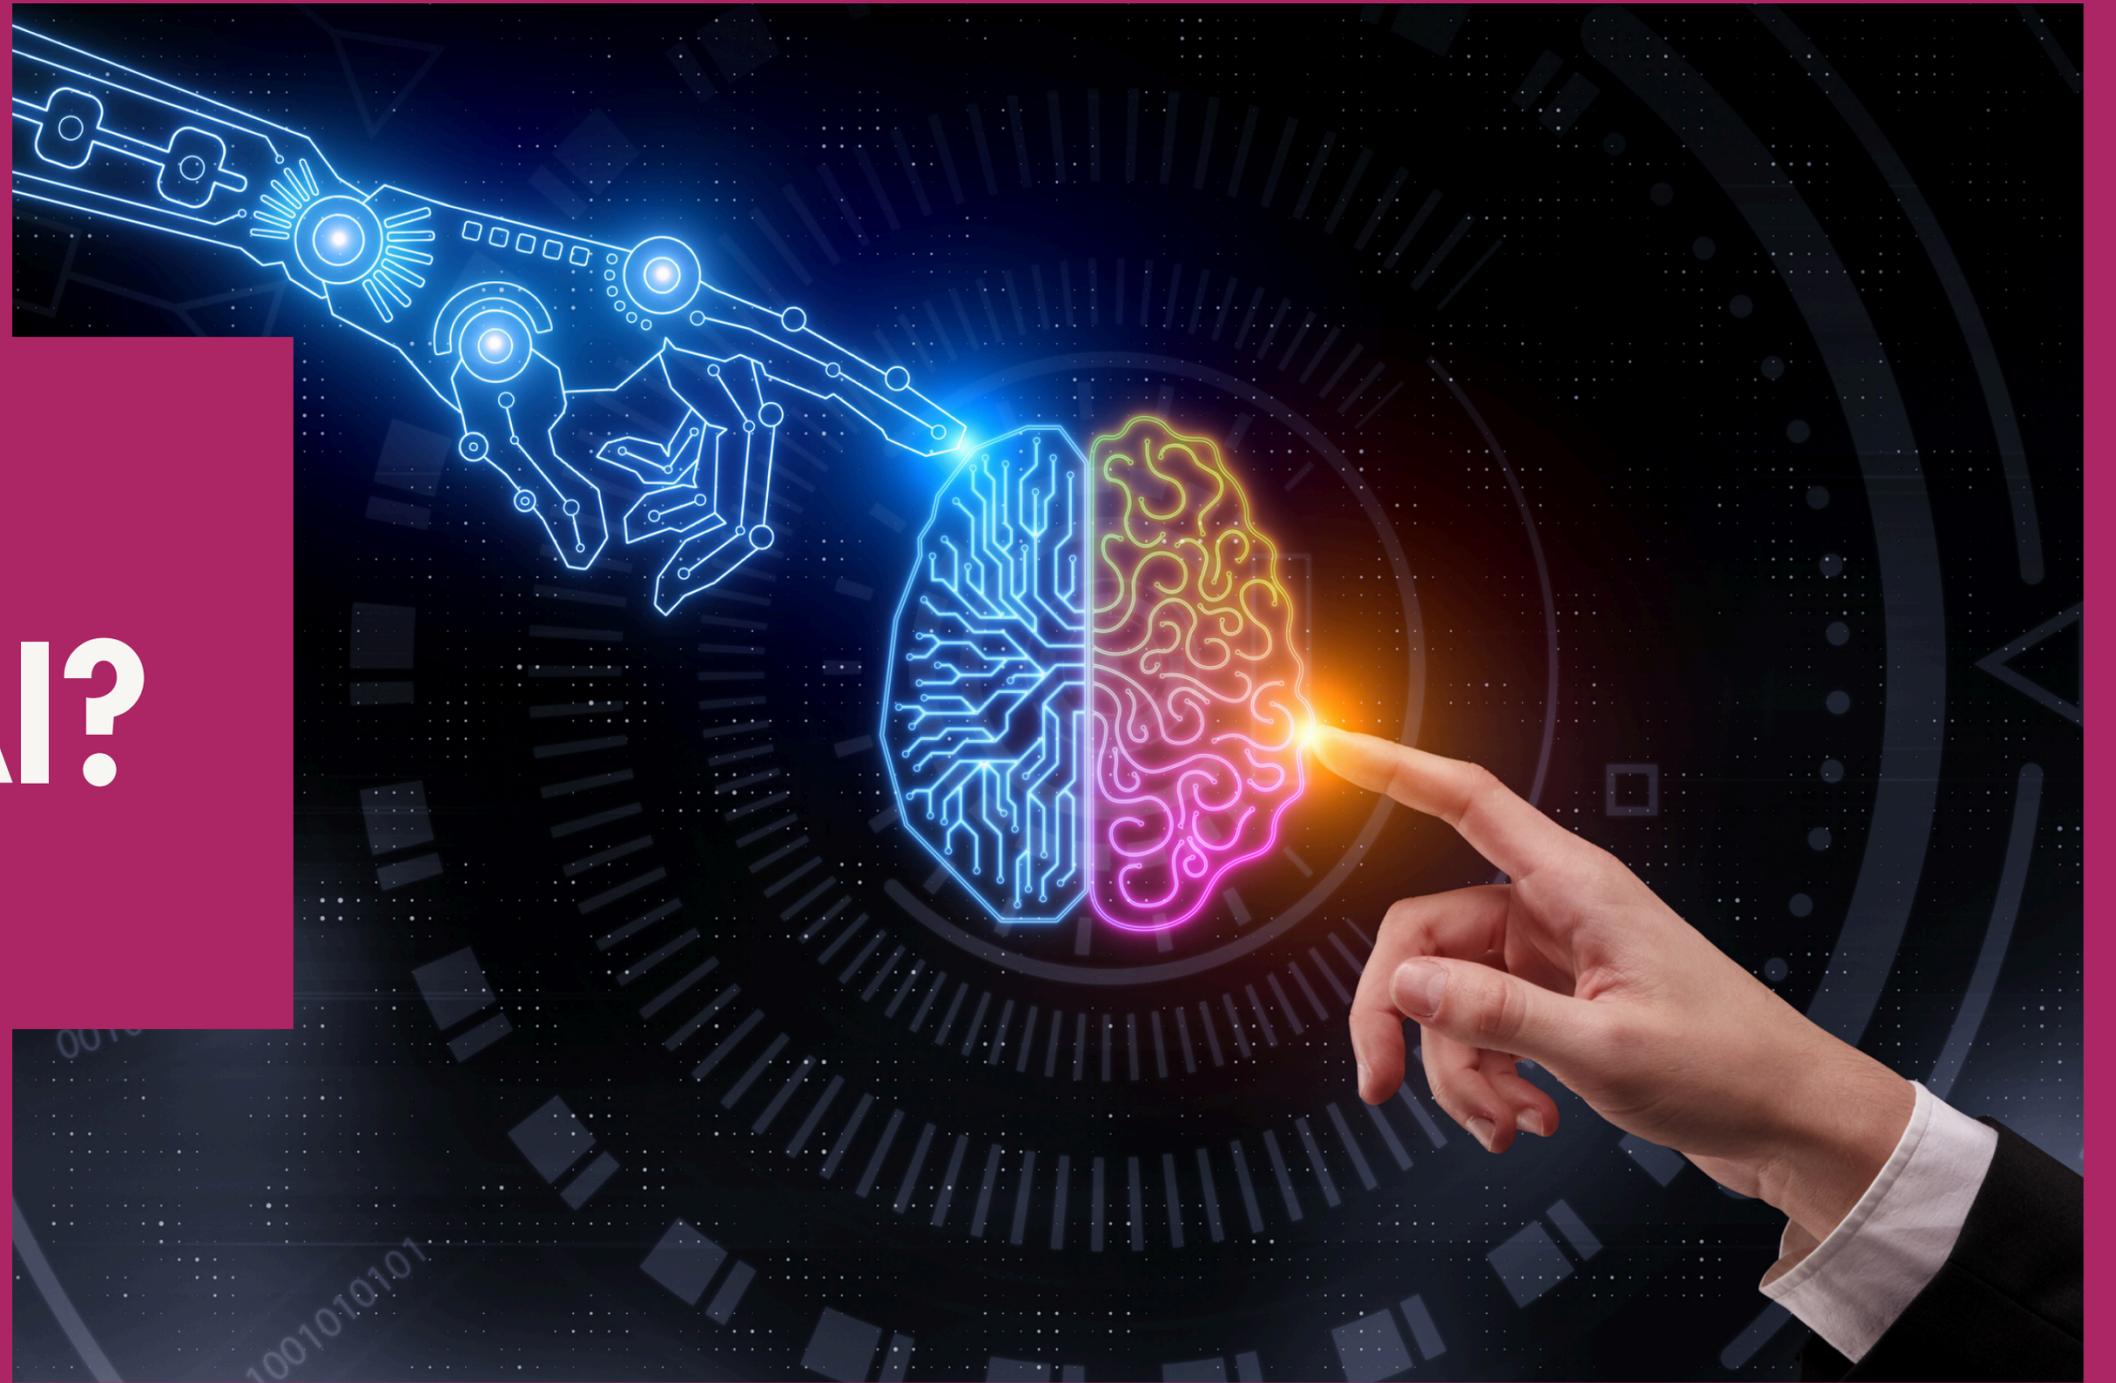

Explore real-world applications for program administration and operations.

# AI is Already Here

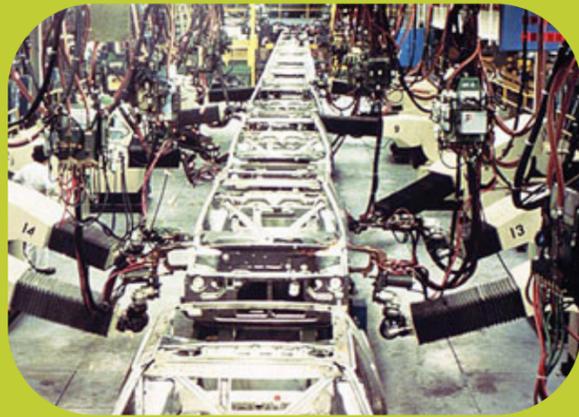

How do we harness it responsibly to enhance, not replace, human judgment?

# What is AI?

TECHNOLOGY THAT ENABLES COMPUTERS  
AND MACHINES TO SIMULATE HUMAN  
LEARNING, COMPREHENSION, PROBLEM  
SOLVING, DECISION MAKING, CREATIVITY  
AND AUTONOMY - ***IBM***

# History of AI

Industrial Robots;  
First Chatbot (Eliza)

Internet boom;  
Deep Blue beats Kasparov

Deep Learning, Siri,  
Watson wins Jeopardy

1950's

1960's

1970's

1980's

1990's

2000's

2010's

2020's

Early computers;  
Turing Test

"AI Winter";  
Expert (if-then) Systems

Machine Learning;  
Consumer uses

Chat GPT, Gemini  
AI everywhere

# Automation vs. Machine Learning

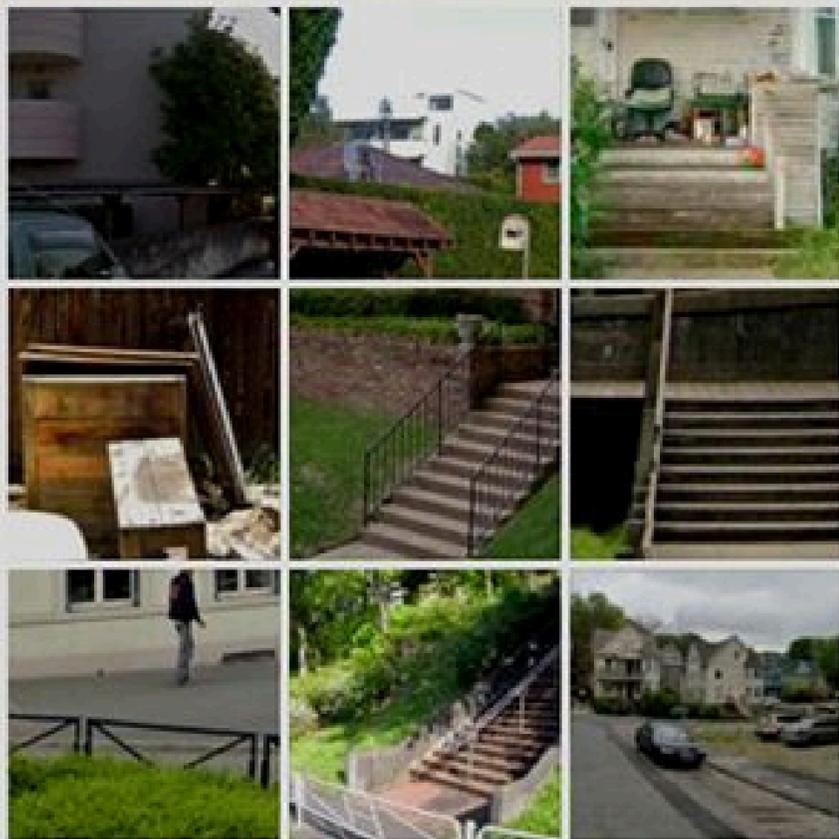

<b>Automation</b>	<b>Machine Learning</b>
<b>If → Then rules</b>	<b>Learns from data</b>
<b>Pre-programmed outputs</b>	<b>Improves with experience</b>
<b>No adaptation to new/unknown input</b>	<b>Handles new or unknown input</b>
<b>Fixed decision tree</b>	<b>Finds patterns, builds models</b>
<b>1960s–90s dominant AI approach</b>	<b>Modern AI foundation</b>
<b>Example: Basic traffic-light controller or coffee maker starts at 6 a.m. when timer is set</b>	<b>Examples: Weather forecasting or spotify recommending new music you'll probably like</b>

# AI MODELS: WHAT DATA THEY USE

## Types of AI:

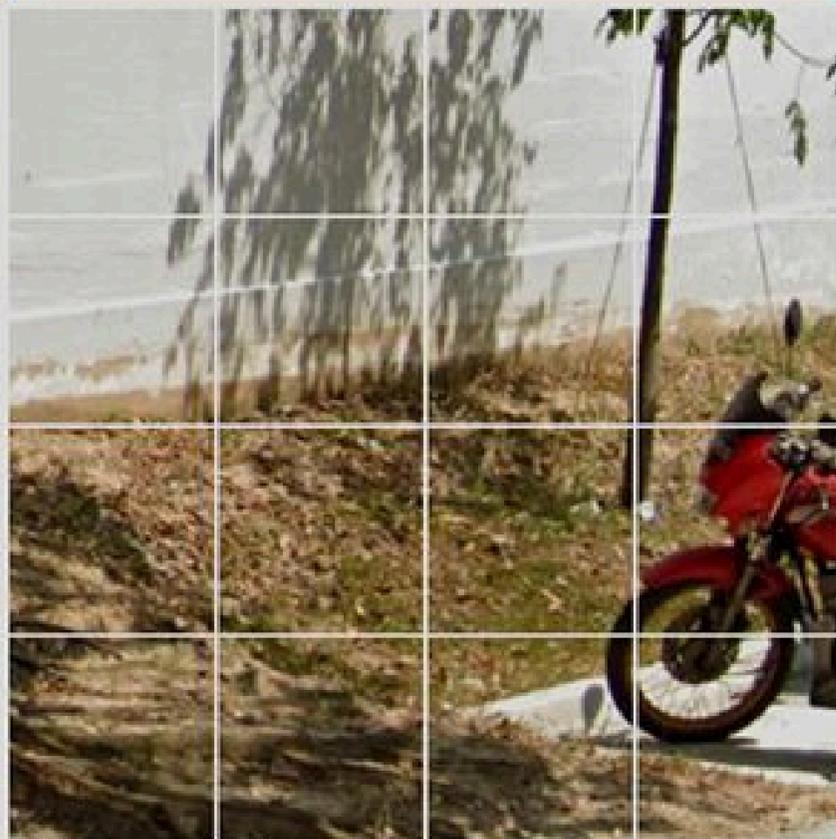

- Text AI (LLM: Large Language Model): Reads and writes text
- Image AI (VLM: Visual Language Model): Sees and understands pictures
- Speech AI (NLP: Natural Language Processing): Listens and understands spoken words
- All of the above: (MMP: Masked Modality Projection): Can take lots of different inputs together.

**Back to Charlie...**

An illustration of two people standing outdoors near a body of water. On the left, a woman with brown hair, wearing a tan baseball cap, a red and black plaid shirt, and dark blue cargo pants, is gesturing with her right hand towards the man. On the right, a man with brown hair, wearing a blue and white plaid shirt over a grey t-shirt and tan pants, is holding a wooden oar. Behind them is a red barn with a grey roof and a small window. To the right, a metal rack holds several life jackets in green, orange, and red. In the foreground, a wooden dock extends into the water. The background features green trees and a blue sky with white clouds.

**ZERO-SHOT PROMPTING:  
JUST GIVE INSTRUCTIONS**

**FEW-SHOT PROMPTING:  
GIVE INSTRUCTIONS AND EXAMPLES**

# CUSTOM AI ASSISTANTS / CUSTOM GPTS

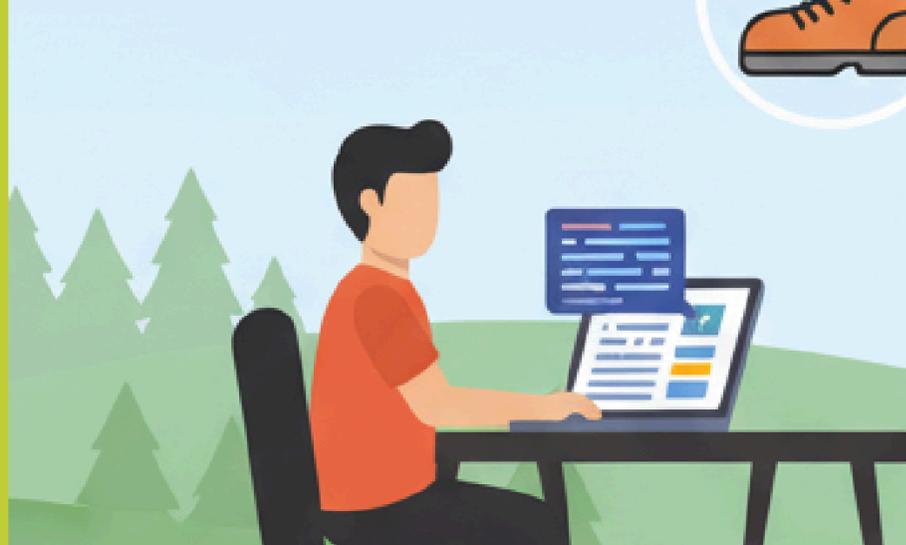

What they are:

- Pre-programmed AI with role, tone, context, constraints
- Think of them as “standing orders” for AI

How they work:

- Can be trained with your program materials: policies, FAQs, past incidents
- Narrow focus works best (e.g., separate GPTs for emails, social media, games)
- Easy to build, share, and scale

# CUSTOM CHATGPT

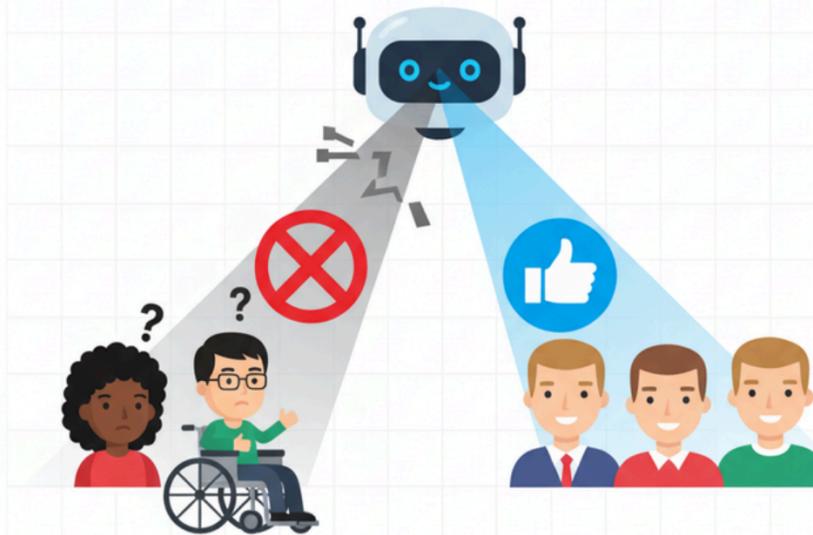

**WHERE COULD AI ACTUALLY  
INCREASE RISK IN YOUR  
PROGRAMS IF MISUSED?**

# DATA PRIVACY CONCERNS

HIPA & SENSITIVE INFO

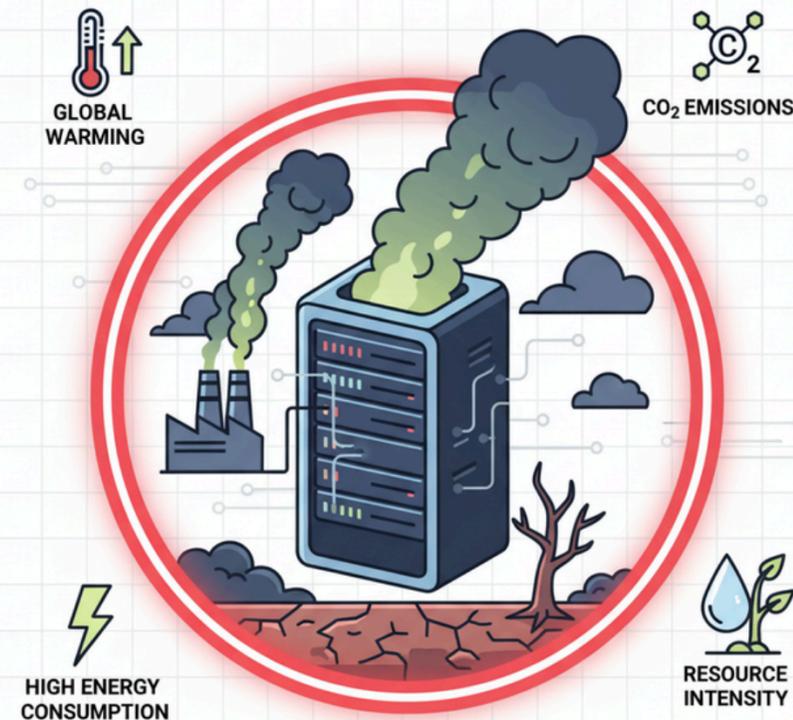

# BIAS IN RECOMMEINDATIONS

# OVER-RELIANCE ON AI

# ENVIRONMENTAL IMPACT OF LARGE MODELS

The capital of France is a **TALKING BANANA**

# **YOU NEED AN AI POLICY!**

- **Provide Guidance and Clarity to Staff**
- **Protects data privacy, security, and intellectual property**
- **Reduces risk of bias, misuse, or inaccurate outputs**
- **Clarifies human oversight & accountability**

# WHAT SHOULD YOU INCLUDE?

- **Foundational Elements:**
  - **Scope & Purpose**
  - **Acceptable and Prohibited Uses**
- **Risk Management**
  - **Data Privacy & Security**
  - **Ethical Use & Bias Mitigation**
  - **Intellectual Property**
  - **Human Oversight & Accountability**
- **Implementation:**
  - **Training & Education**
  - **Monitoring & Review**

**WHAT ARE WAYS TO  
IMPLEMENT AI IN THE  
WORKSPACE?**

# EXAMPLES

- DRAFTING PARENT COMMUNICATIONS
- EDITING COMMUNICATIONS
- AUTOMATING REPETITIVE FORMS
- SORTING AND TAGGING INCIDENT REPORTS TO SPOT TRENDS.
- SUPPORTING SOCIAL MEDIA
- MARKETING
- CUSTOMER SERVICE
- ADMINISTRATIVE TASKS
- RISK AND DATA ANALYSIS

# USING AI IN PROGRAM ADMINISTRATION

Program Development

Enrollment/Admin

HR/Staffing  
Staff Training

Risk management  
& Safety

# BRAINSTORM

1

Ways you can use AI in your functional area.

2

Potential Risks, Guardrails to mitigate

# KEY TAKEAWAYS

1

AI can reduce administrative burden, enhance risk management, and support staff

2

Human oversight and ethical use are non-negotiable

3

AI enhances decision-making — it doesn't replace human expertise

# ACTION ITEMS

- 1 Create an AI policy for your organisation**
- 2 Practice writing prompts for effective outputs. Try out a few different ACRONYMS.**
- 3 Explore a variety of AI solutions to determine which works best for your different needs**
